DETAILED ACTION

Drawings

1. The drawings were received on May 2nd, 2007. These drawings are acceptable.

Response to Arguments

2. Applicant's arguments filed May 2nd, 2007, with respect to the objection to the drawings have been fully considered and are persuasive. The objection to Figs. 4-6 has been withdrawn.
3. Application's arguments filed May 2nd, 2007, with respect to claim 2 have been fully considered and are persuasive. See the examiner's statement of reasons for allowance below.

Allowable Subject Matter

4. Claim 2 is allowed.
5. The following is an examiner's statement of reasons for allowance:

The closest prior art of record, Kabasawa (US 7,082,084 B2; corresponds to JP 2003-109234, disclosed in IDS), discloses:

An optical pickup device for driving and controlling a lens holder holding an objective lens by using a moving coil method (abstract), and for adjusting an irradiation position of a laser beam on an optical disk by displacing the objective lens (abstract), the device comprising:

a lens holder for holding the objective lens, an opening formed in the lens holder (visible in, for example, Fig. 5: the objective lens is 4 and the lens holder is 1);

a stepped portion formed in an outer circumferential portion of the opening (the stepped portion is visible in Fig. 5).

Kabasawa does not disclose:

a cut-out portion formed in the stepped portion closest to a rising mirror (Kabasawa discloses a space in the lens holder closest to a rising mirror, as visible in Fig. 5: this could be considered cut out, but it does not allow light to reach the objective lens through it, and thus does not require the next element); and

a light shielding ring arranged on the stepped portion to seal the cut-out portion (not necessary in Kabasawa since the space is not completely cut out).

Therefore these limitations in combination with the other limitations in the claim render it allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

Kobayashi et al. (US 5,555,232) discloses a cut-out portion formed in a stepped portion of a lens holder closest to a rising mirror (Fig. 7), but does not disclose a light shielding ring arranged on the stepped portion to seal the cut-out portion (there is a reflecting member 138 but it is not on the stepped portion and does not seal the cut-out portion).

Fujii et al. (US 2001/0021164) discloses a cut-out portion formed in a lens holder (Fig. 3), but as per Kabasawa it is not cut-out all the way to the lens and thus does not require a light shielding ring; similar for Izuka (US 5,555,228).
